Algebras, Rings and Modules: Volume 2 (Mathematics and Its Applications)

By Michiel Hazewinkel, Nadiya Gubareni, V.V. Kirichenko

Algebras, Rings and Modules: Volume 2 (Mathematics and Its Applications)
By Michiel Hazewinkel, Nadiya Gubareni, V.V. Kirichenko

This second volume of this text covers the classical aspects of the theory of groups and their representations. It also offers a general introduction to the modern theory of representations including the representations of quivers and finite partially ordered sets and their applications to finite dimensional algebras. It reviews key recent developments in the theory of special ring classes including Frobenius, quasi-Frobenius, and others.

Editorial Review

Review

From the reviews:

"This is the first of two volumes which aim to take the theory of associative rings and their modules from fundamental definitions to the research frontier. The book is written at a level intended to be accessible to students who have taken standard basic undergraduate courses in linear algebra and abstract algebra. … has been written with considerable attention to accuracy, and has been proofread with care. … A very welcome feature is the substantial set of bibliographic and historical notes at the end of each chapter." (Kenneth A. Brown, Mathematical Reviews, 2006a)

"The authors concentrate on the representation theory (of groups, algebras, posets …) and on the structure of some special rings. … The book is written on a level accessible to advanced students who have some experience with algebra. … Interesting historical comments and references close each chapter. A list of references for further reading is providing at the end of the book." (Stanislaw Kasjan, Mathematical Reviews, Issue 2009 b)

Users Review

From reader reviews:

Susan Martinez:

Do you have favorite book? In case you have, what is your favorite's book? Reserve is very important thing for us to understand everything in the world. Each reserve has different aim as well as goal; it means that guide has different type. Some people feel enjoy to spend their time for you to read a book. They can be reading whatever they consider because their hobby is usually reading a book. Why not the person who don't like looking at a book? Sometime, man or woman feel need book when they found difficult problem or perhaps exercise. Well, probably you will require this Algebras, Rings and Modules: Volume 2 (Mathematics and Its Applications).

Albertha Lemons:

Now a day people that Living in the era exactly where everything reachable by talk with the internet and the resources inside it can be true or not involve people to be aware of each data they get. How people have to be smart in acquiring any information nowadays? Of course the solution is reading a book. Looking at a book can help people out of this uncertainty Information specifically this Algebras, Rings and Modules: Volume 2 (Mathematics and Its Applications) book since this book offers you rich facts and knowledge. Of course the data in this book hundred % guarantees there is no doubt in it you may already know.

Donna Gamble:

Would you one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Try to pick one book that you never know the inside because don't ascertain book by its handle may doesn't work is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside seem likes. Maybe you answer might be Algebras, Rings and Modules: Volume 2 (Mathematics and Its Applications) why because the excellent cover that make you consider about the content will not disappoint you actually. The inside or content is fantastic as the outside or cover. Your reading 6th sense will directly make suggestions to pick up this book.

Joshua Miner:

As a university student exactly feel bored to help reading. If their teacher requested them to go to the library or make summary for some guide, they are complained. Just tiny students that has reading's soul or real their leisure activity. They just do what the teacher want, like asked to the library. They go to right now there but nothing reading really. Any students feel that reading through is not important, boring and also can't see colorful images on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this era, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Algebras, Rings and Modules: Volume 2 (Mathematics and Its Applications) can make you sense more interested to read.
