## Editorial Review

### About the Author

**Marge Lial** has always been interested in math; it was her favorite subject in the first grade! Marge's intense desire to educate both her students and herself has inspired the writing of numerous best-selling textbooks. Marge, who received Bachelor's and Master's degrees from California State University at Sacramento, is now affiliated with American River College. Marge is an avid reader and traveler. Her travel experiences often find their way into her books as applications, exercise sets, and feature sets. She is particularly interested in archeology. Trips to various digs and ruin sites have produced some fascinating problems for her textbooks involving such topics as the building of Mayan pyramids and the acoustics of ancient ball courts in the Yucatan.

When **John Hornsby** enrolled as an undergraduate at Louisiana State University, he was uncertain whether he wanted to study mathematics education or journalism. His ultimate decision was to become a teacher, but after twenty-five years of teaching at the high school and university levels and fifteen years of writing mathematics textbooks, both of his goals have been realized. His love for both teaching and for mathematics is evident in his passion for working with students and fellow teachers as well. His specific professional interests are recreational mathematics, mathematics history, and incorporating graphing calculators into the curriculum. John's personal life is busy as he devotes time to his family (wife Gwen, and sons Chris, Jack, and Josh). He has been a rabid baseball fan all of his life. John's other hobbies include numismatics (the study of coins) and record collecting. He loves the music of the 1960s and has an extensive collection of the recorded works of Frankie Valli and the Four Seasons.

**David Schneider** has taught mathematics at universities for over 34 years and has authored 36 books. He has an undergraduate degree in mathematics from Oberlin College and a PhD in mathematics from MIT. During most of his professional career, he was on the faculty of the University of Maryland--College Park. His hobbies include travel, dancing, bicycling, and hiking.

**Callie Daniels** has always had a passion for learning mathematics and brings that passion into the classroom with her students. She attended the University of the Ozarks on an athletic scholarship, playing both basketball and tennis. While there, she earned a bachelor's degree in Secondary Mathematics Education as well as the NAIA Academic All-American Award. She has two master's degrees: one in Applied Mathematics and Statistics from the University of Missouri-Rolla, the second in Adult Education from the University of Missouri- St. Louis. Her hobbies include watching her sons play sports, riding horses, fishing, shooting photographs, and playing guitar. Her professional interests include improving success in the community college mathematics sequence, using technology to enhance students' understanding of mathematics, and creating materials that support classroom teaching and student understanding.

## Users Review

### From reader reviews:

#### Thomas Britton:

Nowadays reading books be than want or need but also become a life style. This reading habit give you lot of

advantages. The advantages you got of course the knowledge the rest of the information inside the book in which improve your knowledge and information. The information you get based on what kind of e-book you read, if you want attract knowledge just go with education books but if you want feel happy read one along with theme for entertaining like comic or novel. The Precalculus is kind of guide which is giving the reader unpredictable experience.

**Kevin Porter:**

A lot of people always spent all their free time to vacation or maybe go to the outside with them family members or their friend. Were you aware? Many a lot of people spent these people free time just watching TV, or perhaps playing video games all day long. In order to try to find a new activity here is look different you can read some sort of book. It is really fun in your case. If you enjoy the book which you read you can spent the whole day to reading a e-book. The book Precalculus it is extremely good to read. There are a lot of folks that recommended this book. We were holding enjoying reading this book. Should you did not have enough space to deliver this book you can buy typically the e-book. You can m0ore effortlessly to read this book through your smart phone. The price is not very costly but this book provides high quality.

**Rex Oswald:**

Reading can called mind hangout, why? Because if you are reading a book particularly book entitled Precalculus your head will drift away trough every dimension, wandering in every aspect that maybe unknown for but surely might be your mind friends. Imaging just about every word written in a e-book then become one form conclusion and explanation that will maybe you never get just before. The Precalculus giving you a different experience more than blown away your mind but also giving you useful information for your better life on this era. So now let us present to you the relaxing pattern here is your body and mind are going to be pleased when you are finished reading through it, like winning a sport. Do you want to try this extraordinary investing spare time activity?

**John Rowland:**

In this era which is the greater man or who has ability in doing something more are more special than other. Do you want to become one among it? It is just simple strategy to have that. What you need to do is just spending your time very little but quite enough to experience a look at some books. One of many books in the top checklist in your reading list will be Precalculus. This book that is certainly qualified as The Hungry Hillsides can get you closer in becoming precious person. By looking up and review this book you can get many advantages.
