Orlicky's Material Requirements Planning, Third Edition (Mechanical Engineering) By Carol Ptak, Chad Smith

"The definitive reference for the next generation of manufacturing practitioners and leaders." -- From the Foreword by Dave Turbide, CFPIM, CMfgE, CIRM, CSCP

"Finally, MRP has been brought into our new age where, in order to fight for increased share and profitability, manufacturers must not only cope with market volatility and supply chain variability, they must embrace it as a competitive weapon." -- Bob Reary, Fellow-level Certificate, APICS

A fully revised and updated edition of the landmark work on material requirements planning (MRP), *Orlicky's Material Requirements Planning*, Third Edition focuses on the new rules required to effectively support a manufacturing operation using MRP systems in the twenty-first century. This authoritative resource offers proven solutions that help you gain the competitive edge through strategic lead time reductions, substantial reductions in total inventory investment, and significant increases in service levels. This is an indispensable tool for manufacturing practitioners and anyone preparing for CPIM certification.

Coverage includes:

- Inventory in a manufacturing environment
- Principles of MRP
- MRP system
- Processing logic
- Lot sizing
- System records and files
- Product definition
- Master production schedule
- Inventory planning and control system
- System effectiveness
- Industry effect on MRP
- Project manufacturing
- Remanufacturing

- Process industry application
- Repetitive manufacturing application
- Sales and operations planning
- Evolution of MRP and planning systems
- Demand driven MRP (DDMRP) logic
- Strategic inventory positioning
- Dynamic buffers
- Demand driven planning
- Highly visible and collaborative execution
- DDMRP performance reporting and analytics
- DDMRP future

Building on the pioneering work of Joseph Orlicky, this new edition of the classic text on material requirements planning (MRP) reveals the next evolutionary step for materials and supply chain synchronization in the modern manufacturing landscape.

Orlicky's Material Requirements Planning, Third Edition reviews the poor business results embedded in many of today's manufacturing systems, discusses the core problems causing these results, explains an alternative pull structure for planning and controlling materials flow, and presents results from actual implementations.

This thoroughly updated edition offers comprehensive coverage of MRP, describes the current state of the MRP application, and identifies the fundamental changes required to achieve sustainable success given the current global circumstances and technology options. This state-of-the art guide articulates the next generation of MRP logic--demand driven MRP (DDMRP)--and provides a roadmap for the near and distant future for this critical manufacturing management tool.

Carol Ptak is currently a partner with the Demand Driven Institute, and was most recently at Pacific Lutheran University as Visiting Professor and Distinguished Executive in Residence. Previously, she was vice president and global industry executive for manufacturing and distribution industries at PeopleSoft where she developed the concept of demand driven manufacturing (DDM). Ms. Ptak spent four years at IBM Corporation culminating in the position of global SMB segment executive.

Chad Smith is cofounder and managing partner of Constraints Management Group, a services and technology company specializing in pull-based manufacturing, materials, and project management systems for mid-range and large manufacturers. He has been at the forefront of developing and articulating demand driven MRP and is also an internationally recognized expert on the theory of constraints (TOC).

Carol and Chad founded the Demand Driven Institute, an organization devoted to the proliferation and further development of demand driven strategies and tactics in industry.

Orlicky's Material Requirements Planning, Third Edition (Mechanical Engineering) By Carol Ptak, Chad Smith Bibliography

- Sales Rank: #570711 in Books
- Published on: 2011-06-01
- Original language: English
- Number of items: 1
- Dimensions: 9.50" h x 1.30" w x 7.60" l, 2.45 pounds
- Binding: Hardcover
- 544 pages

Editorial Review

About the Author

Carol Ptak is currently freelancing and was most recently at Pacific Lutheran University as Visiting Professor and Distinguished Executive in Residence after years of executive management experience at PeopleSoft and IBM Corporation as well as many years of consulting expertise. Previously, Ptak served as the vice president and global industry executive for manufacturing and distribution industries at PeopleSoft. Here she developed the concept of Demand Driven Manufacturing (DDM) as an overall product and marketing strategy to align product development, market awareness and demand generation. Her innovative approach is credited with significantly improving the company's position in the manufacturing industry software market and earned her national recognition in publications such as CFO Magazine and the New York Times. Prior to her accomplished record at PeopleSoft, Ptak spent four years at IBM Corporation starting as a member of the worldwide ERP/SCM solutions sales team and quickly rising to the position of global SMB segment executive. From 1993-98, Ptak owned Eagle Enterprises, a consulting firm that promotes company-wide excellence through education and successful implementation.

Chad Smith is the co-founder and Managing Partner of Constraints Management Group (CMG: www.thoughtwarepeople.com), a services and technology company specializing in pull-based manufacturing, materials, and project management systems for mid-range and large manufacturers. Clients include LeTourneau Technologies, Boeing, Intel, Erickson Air-Crane, Siemens, IBM, The Charles Machine Works (Ditch Witch), and Oregon Freeze Dry. Chad and his partners have been at the forefront of developing and articulating Demand Driven MRP. Chad is also an internationally recognized expert in the Theory of Constraints (TOC).

Users Review

From reader reviews:

Leonard Bassett:

The book Orlicky's Material Requirements Planning, Third Edition (Mechanical Engineering) gives you the sense of being enjoy for your spare time. You need to use to make your capable much more increase. Book can for being your best friend when you getting stress or having big problem along with your subject. If you can make examining a book Orlicky's Material Requirements Planning, Third Edition (Mechanical Engineering) being your habit, you can get much more advantages, like add your capable, increase your knowledge about several or all subjects. You are able to know everything if you like open up and read a publication Orlicky's Material Requirements Planning, Third Edition (Mechanical Engineering). Kinds of book are several. It means that, science publication or encyclopedia or others. So , how do you think about this publication?

Carl Adams:

Hey guys, do you wishes to finds a new book you just read? May be the book with the name Orlicky's Material Requirements Planning, Third Edition (Mechanical Engineering) suitable to you? The particular

book was written by well known writer in this era. The actual book untitled Orlicky's Material Requirements Planning, Third Edition (Mechanical Engineering) is the main of several books that everyone read now. This specific book was inspired many people in the world. When you read this guide you will enter the new shape that you ever know just before. The author explained their idea in the simple way, so all of people can easily to know the core of this guide. This book will give you a great deal of information about this world now. So that you can see the represented of the world with this book.

Pat Tran:

In this particular era which is the greater particular person or who has ability to do something more are more valuable than other. Do you want to become among it? It is just simple method to have that. What you need to do is just spending your time little but quite enough to get a look at some books. One of many books in the top record in your reading list is Orlicky's Material Requirements Planning, Third Edition (Mechanical Engineering). This book that is qualified as The Hungry Slopes can get you closer in turning out to be precious person. By looking way up and review this e-book you can get many advantages.

Kyle Reese:

Guide is one of source of expertise. We can add our information from it. Not only for students but in addition native or citizen want book to know the update information of year in order to year. As we know those textbooks have many advantages. Beside we all add our knowledge, could also bring us to around the world. With the book Orlicky's Material Requirements Planning, Third Edition (Mechanical Engineering) we can have more advantage. Don't you to definitely be creative people? Being creative person must prefer to read a book. Just choose the best book that suited with your aim. Don't end up being doubt to change your life by this book Orlicky's Material Requirements Planning, Third Edition (Mechanical Engineering). You can more inviting than now.
