Reconstructing Quaternary Environments By J. John Lowe, Michael J.C Walker

This third edition of *Reconstructing Quaternary Environments* has been completely revised and updated to provide a new account of the history and scale of environmental changes during the Quaternary. The evidence is extremely diverse ranging from landforms and sediments to fossil assemblages and geochemical data, and includes new data from terrestrial, marine and ice-core records. Dating methods are described and evaluated, while the principles and practices of Quaternary stratigraphy are also discussed. The volume concludes with a new chapter which considers some of the key questions about the nature, causes and consequences of global climatic and environmental change over a range of temporal scales. This synthesis builds on the methods and approaches described earlier in the book to show how a number of exciting ideas that have emerged over the last two decades are providing new insights into the operation of the global earth-ocean-atmosphere system, and are now central to many areas of contemporary Quaternary research.

This comprehensive and dynamic textbook is richly illustrated throughout with full-colour figures and photographs. The book will be of interest to undergraduates, postgraduates and professionals in Earth Science, Environmental Science, Physical Geography, Geology, Botany, Zoology, Ecology, Archaeology and Anthropology

Editorial Review

Review

"This is a splendid compendium of what we know and understand about Quaternary environments, and how we study them. Lowe and Walker are to be congratulated on this fully updated version of their popular textbook. *Reconstructing Quaternary Environments* continues to be a must for Quaternary sciences courses at all university levels and an indispensable reference source for professional geoscientists. This new edition is beautifully illustrated and provides diverse examples from around the world; it is a real *tour de force* of Quaternary studies."

Professor Lewis Owen, Department of Geology, University of Cincinnati, USA

"The literature in Quaternary environmental and climatic change has increased exponentially during the last decades and now covers a wide range of archives, proxies and modelling studies. In this revised and updated 3rd edition, Lowe and Walker have successfully integrated the wealth of new data from around the world. The up-to-date information and references, the elegant language, the explanatory notes after each chapter and full-colour illustrations and photos all serve to make this wonderful textbook a treasure trove for students, researchers and anyone else interested in finding out more about the exciting subject of Quaternary climate and environmental change."

Professor Barbara Wohlfarth, Department of Geological Sciences, Stockholm University, Sweden

"The third edition of *Reconstructing Quaternary Environments* by John Lowe and Mike Walker continues the impressive standards set by its two predecessor volumes. Well written, extensively referenced and with numerous clear diagrams and colour figures, it sets the standard for textbooks on Quaternary science and the techniques to reconstruct environmental change. It should be essential reading for students and will be an invaluable reference for all those with an interest in the Quaternary."

Professor Colm O'Cofaigh, Department of Geography, Durham University, UK

"A good reference for courses (if complemented by a work with better focus on the human record) and a general introduction to this topic. Summing Up: Recommended. Upper-division undergraduates, graduate students, researchers/faculty."

CHOICE, E. Delson, CUNY Herbert H. Lehman College

About the Author

John Lowe is former Gordon Manley Professor of Geography and Quaternary Science, and now Emeritus Professor of Quaternary Science, Royal Holloway University of London.

Mike Walker is Emeritus Professor of Quaternary Science, School of Archaeology, History and Anthropology at Trinity Saint David, University of Wales, Lampeter, and Honorary Professor, Aberystwyth University.

Users Review

From reader reviews:

Amy Rodriguez:

Do you have favorite book? For those who have, what is your favorite's book? E-book is very important thing for us to know everything in the world. Each guide has different aim or maybe goal; it means that publication has different type. Some people really feel enjoy to spend their time to read a book. They are really reading whatever they acquire because their hobby is usually reading a book. How about the person who don't like reading through a book? Sometime, particular person feel need book whenever they found difficult problem or exercise. Well, probably you will want this Reconstructing Quaternary Environments.

Stephanie Armstrong:

Book is written, printed, or created for everything. You can know everything you want by a e-book. Book has a different type. As you may know that book is important point to bring us around the world. Beside that you can your reading proficiency was fluently. A publication Reconstructing Quaternary Environments will make you to end up being smarter. You can feel a lot more confidence if you can know about every little thing. But some of you think in which open or reading a book make you bored. It's not make you fun. Why they can be thought like that? Have you trying to find best book or suitable book with you?

Lucy Nelson:

Hey guys, do you wants to finds a new book to see? May be the book with the name Reconstructing Quaternary Environments suitable to you? The book was written by famous writer in this era. The particular book untitled Reconstructing Quaternary Environments is the main of several books which everyone read now. This specific book was inspired a number of people in the world. When you read this reserve you will enter the new age that you ever know prior to. The author explained their plan in the simple way, thus all of people can easily to recognise the core of this book. This book will give you a lot of information about this world now. To help you see the represented of the world with this book.

Cheri Adamo:

You are able to spend your free time you just read this book this e-book. This Reconstructing Quaternary Environments is simple to bring you can read it in the recreation area, in the beach, train as well as soon. If you did not have got much space to bring typically the printed book, you can buy the particular e-book. It is make you simpler to read it. You can save often the book in your smart phone. So there are a lot of benefits that you will get when you buy this book.
