Veterinary Anaesthesia, 11e By Kathy W. Clarke MA VetMB DVA DVetMed MRCVS, Cynthia M. Trim BVSc MRCVS DVA DACVA DECVA

An acknowledged classic in its field, *Veterinary Anaesthesia* 11th edition has undergone a thorough revision to bring you the latest information in a more accessible format than ever before. The book meets the needs of several groups. For students, it provides basic concepts and 'how to' advice on anaesthetizing animals. For veterinarians in practice or those working with laboratory animals it's an excellent reference that draws on both the considerable experience of the authors and on published scientific data. Those wishing to specialize in veterinary anaesthesia will find it a stimulating introduction to the subject. This revision has been expanded to incorporate evidence-based information, additional chapters on advances in analgesia, anaesthesia of small mammals, fish and wildlife, and updated information on cardiopulmonary cerebral resuscitation (CPCR).

The wide range of species covered and the clear descriptions of basic principles, techniques and equipment, coupled with an extensive literature review, make *Veterinary Anaesthesia 11th edition* your essential companion whether in classroom or in clinic. 'The before, during, after, how and why of every anaesthesia is clearly explained in this thorough "anaesthesia" bible ... No doubt this will be a reference throughout your professional career, whatever path you follow'. **Reviewed by:** Fabienne Dethioux , Tomorrow's Vets **Date:** December 2014

"The layout is attractive and easy to use, and the book covers both general principles and practical advice. It should be on the shelves of every veterinary practice and in every student's library." **Reviewed by:** Polly Taylor. **Date:** July 2014

- all large and small animal species covered in one book: includes new advances in anaesthesia in horses, birds, lab animals and wild animals
- glossary of USA and UK drug names: up-dated coverage of all new anaesthetic agents in Europe and the USA
- first section covers principles of drug action, pharmacokinetics and pharmacodynamics

- the only book to discuss anaesthesia of individual species in detail: lot of info on anaesthesia of goats, sheep and other herbivores such as camels and llamas
- also covers analgesia in all species
- chapter on special cases such as anaesthesia in obstetrics
- chapter on anaesthetic accidents and crises !
 - Presents a range of new chapters from contributors of international repute.
 - The evidence base has been expanded and, wherever possible, information is supported by a review of the literature.
 - Now in colour throughout, the all-new design includes check-list boxes to facilitate understanding/troubleshooting and increase safety.
 - New illustrations have been added in many chapters to clarify practical points of technique.

Editorial Review

Review

"In this age of emphasis on evidencebased veterinary medicine the authors fulfill their intention to expand this theme. However, opinion of such experienced anaesthetists should not be discounted; while there is more evidence than opinion than in previous editions, when evidence is sparse, the common sense advice from these authors is well founded. The layout is attractive and easy to use, and the book covers both general principles and practical advice. It should be on the shelves of every veterinary practice and in every student's library." **Reviewed by:** Polly Taylor. **Date:** 25/07/2014

"The before, during, after, how and why of every anaesthesia is clearly explained in this thorough "anaesthesia" bible. The different anaesthetic methods are described in detail and, in the second part of the book, species specificities are also taken into account. No doubt this will be a reference throughout your professional career, whatever path you follow'. **Reviewed by:** Fabienne Dethioux **Date:** December 2014

From reader reviews:

Elizabeth Brown:

Nowadays reading books become more than want or need but also be a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge the actual information inside the book in which improve your knowledge and information. The information you get based on what kind of publication you read, if you want have more knowledge just go with education books but if you want truly feel happy read one along with theme for entertaining for instance comic or novel. Typically the Veterinary Anaesthesia, 11e is kind of reserve which is giving the reader unstable experience.

David Gaytan:

The reason why? Because this Veterinary Anaesthesia, 11e is an unordinary book that the inside of the guide waiting for you to snap the item but latter it will shock you with the secret this inside. Reading this book alongside it was fantastic author who all write the book in such wonderful way makes the content inside easier to understand, entertaining way but still convey the meaning completely. So , it is good for you because of not hesitating having this any longer or you going to regret it. This excellent book will give you a lot of benefits than the other book get such as help improving your expertise and your critical thinking way. So , still want to delay having that book? If I ended up you I will go to the e-book store hurriedly.

Joshua Parsons:

Playing with family in the park, coming to see the ocean world or hanging out with good friends is thing that usually you may have done when you have spare time, then why you don't try matter that really opposite from that. One particular activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Veterinary Anaesthesia, 11e, you are able to enjoy both. It is good combination right, you still need to miss it? What kind of hang type is it? Oh can occur its mind hangout men. What? Still don't buy it, oh come on its called reading friends.

Theo Garcia:

Do you like reading a reserve? Confuse to looking for your chosen book? Or your book has been rare? Why so many query for the book? But virtually any people feel that they enjoy intended for reading.
