**Codes, Ciphers and Secret Writing (Dover Children's Activity Books)** By Martin Gardner

"A fascinating, challenging book." ? *A.L.A. Booklist*

Learn to use the most important codes and methods of secret communication in use since ancient times. Cipher and decipher codes used by spies. Explore the famous codes that changed the fate of nations and political leaders. And enjoy hours of fun experimenting with cryptography ? the science of secret writing. Beginning with simple letter substitutions and transposition ciphers, world-famous science writer Martin Gardner explains how to break complicated polyalphabetic ciphers and codes worked with grids, squares, triangles, and charts. You'll learn codes that are keyed to typewriters and telephone dials . . . even codes that use playing cards, knots, and swizzle sticks. Experiment with invisible writing ? inks that glow in black light and turn red under heat ? and explore the possibilities of sending messages through outer space to unknown worlds.

Using this book, you can solve the historically famous Playfair Cipher used by Australia in World War II, the Pigpen Cipher used by Confederate soldiers during the Civil War, Thomas Jefferson's Wheel Cipher, the Beaufort system used by the British Royal Navy, codes devised by authors for heroes in literature ? Sherlock Holmes, Captain Kidd, and the Shadow. And you will enjoy experimenting with bizarre methods of message sending ? the Dot Code, Knot Code, Swizzle Code, and more.

Young cryptanalysts, cipher fans, and puzzlists of all ages will find hours of intrigue and challenge in *Codes, Ciphers and Secret Writing*.

"A stimulating must for the intermediate cryptographer." ? *The Kirkus Reviews*

### Editorial Review

#### From the Back Cover

"A fascinating, challenging book." *A.L.A. Booklist*

Learn to use the most important codes and methods of secret communication in use since ancient times. Cipher and decipher codes used by spies. Explore the famous codes that changed the fate of nations and political leaders. And enjoy hours of fun experimenting with cryptography—the science of secret writing. Beginning with simple letter substitutions and transposition ciphers, world-famous science writer Martin Gardner explains how to break complicated polyalphabetic ciphers and codes worked with grids, squares, triangles, and charts. You'll learn codes that are keyed to typewriters and telephone dials . . . even codes that use playing cards, knots, and swizzle sticks. Experiment with invisible writing?inks that glow in black light and turn red under heat?and explore the possibilities of sending messages through outer space to unknown worlds.

Using this book, you can solve the historically famous Playfair Cipher used by Australia in World War II, the Pigpen Cipher used by Confederate soldiers during the Civil War, Thomas Jefferson's Wheel Cipher, the Beaufort system used by the British Royal Navy, codes devised by authors for heroes in literature?Sherlock Holmes, Captain Kidd, and the Shadow. And you will enjoy experimenting with bizarre methods of message sending?the Dot Code, Knot Code, Swizzle Code, and more.

Young cryptanalysts, cipher fans, and puzzlists of all ages will find hours of intrigue and challenge in *Codes, Ciphers and Secret Writing*.

"A stimulating must for the intermediate cryptographer." *The Kirkus Reviews*

Unabridged Dover (1984) republication of the work originally published by Simon & Schuster, 1972.

#### About the Author

Martin Gardner was a renowned author who published over 70 books on subjects from science and math to poetry and religion. He also had a lifelong passion for magic tricks and puzzles. Well known for his mathematical games column in *Scientific American* and his "Trick of the Month" in *Physics Teacher* magazine, Gardner attracted a loyal following with his intelligence, wit, and imagination.

#### Martin Gardner: A Remembrance

The worldwide mathematical community was saddened by the death of Martin Gardner on May 22, 2010. Martin was 95 years old when he died, and had written 70 or 80 books during his long lifetime as an author. Martin's first Dover books were published in 1956 and 1957: *Mathematics, Magic and Mystery*, one of the first popular books on the intellectual excitement of mathematics to reach a wide audience, and *Fads and Fallacies in the Name of Science*, certainly one of the first popular books to cast a devastatingly skeptical eye on the claims of pseudoscience and the many guises in which the modern world has given rise to it. Both of these pioneering books are still in print with Dover today along with more than a dozen other titles of Martin's books. They run the gamut from his elementary *Codes, Ciphers and Secret Writing*, which has been enjoyed by generations of younger readers since the 1980s, to the more demanding *The New Ambidextrous Universe: Symmetry and Asymmetry from Mirror Reflections to Superstrings*, which Dover published in its final revised form in 2005.

To those of us who have been associated with Dover for a long time, however, Martin was more than an author, albeit a remarkably popular and successful one. As a member of the small group of long-time advisors and consultants, which included NYU's Morris Kline in mathematics, Harvard's I. Bernard Cohen in the history of science, and MIT's J. P. Den Hartog in engineering, Martin's advice and editorial suggestions in the formative 1950s helped to define the Dover publishing program and give it the point of view which — despite many changes, new directions, and the consequences of evolution — continues to be operative today.

#### In the Author's Own Words:

"Politicians, real-estate agents, used-car salesmen, and advertising copy-writers are expected to stretch facts in self-serving directions, but scientists who falsify their results are regarded by their peers as committing an inexcusable crime. Yet the sad fact is that the history of science swarms with cases of outright fakery and instances of scientists who unconsciously distorted their work by seeing it through lenses of passionately held beliefs."

"A surprising proportion of mathematicians are accomplished musicians. Is it because music and mathematics share patterns that are beautiful?" — Martin Gardner

## Users Review

### From reader reviews:

#### **Bettie Hentges:**

Why don't make it to be your habit? Right now, try to ready your time to do the important behave, like looking for your favorite book and reading a reserve. Beside you can solve your trouble; you can add your knowledge by the book entitled Codes, Ciphers and Secret Writing (Dover Children's Activity Books). Try to the actual book Codes, Ciphers and Secret Writing (Dover Children's Activity Books) as your friend. It means that it can to be your friend when you experience alone and beside that of course make you smarter than previously. Yeah, it is very fortuned for yourself. The book makes you far more confidence because you can know anything by the book. So , let us make new experience and also knowledge with this book.

#### **Andrew Howe:**

Spent a free a chance to be fun activity to complete! A lot of people spent their sparetime with their family, or their very own friends. Usually they performing activity like watching television, likely to beach, or picnic from the park. They actually doing ditto every week. Do you feel it? Do you wish to something different to fill your personal free time/ holiday? Could possibly be reading a book can be option to fill your free time/ holiday. The first thing you ask may be what kinds of reserve that you should read. If you want to attempt look for book, may be the guide untitled Codes, Ciphers and Secret Writing (Dover Children's Activity Books) can be good book to read. May be it may be best activity to you.

#### **Caroline Hagemann:**

Many people spending their time by playing outside with friends, fun activity along with family or just watching TV all day long. You can have new activity to enjoy your whole day by reading a book. Ugh, ya

think reading a book can really hard because you have to accept the book everywhere? It alright you can have the e-book, bringing everywhere you want in your Cell phone. Like Codes, Ciphers and Secret Writing (Dover Children's Activity Books) which is keeping the e-book version. So , why not try out this book? Let's find.

**Beverly Thomas:**

As a pupil exactly feel bored in order to reading. If their teacher inquired them to go to the library or make summary for some guide, they are complained. Just very little students that has reading's internal or real their pastime. They just do what the professor want, like asked to the library. They go to generally there but nothing reading very seriously. Any students feel that examining is not important, boring as well as can't see colorful photos on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Codes, Ciphers and Secret Writing (Dover Children's Activity Books) can make you experience more interested to read.
