Biometric Systems: Technology, Design and Performance Evaluation

From Springer

Biometric Systems: Technology, Design and Performance Evaluation From Springer

Biometric Systems provides practitioners with an overview of the principles and methods needed to build reliable biometric systems. It covers three main topics: key biometric technologies, design and management issues, and the performance evaluation of biometric systems for personal verification/identification. The four most widely used technologies are focused on - speech, fingerprint, iris and face recognition.

Key features include: in-depth coverage of the technical and practical obstacles which are often neglected by application developers and system integrators and which result in shortfalls between expected and actual performance; and protocols and benchmarks which will allow developers to compare performance and track system improvements.

Editorial Review

Users Review

From reader reviews:

Larry Swartz:

What do you about book? It is not important with you? Or just adding material when you want something to explain what the ones you have problem? How about your free time? Or are you busy particular person? If you don't have spare time to do others business, it is make you feel bored faster. And you have spare time? What did you do? Every individual has many questions above. They must answer that question mainly because just their can do in which. It said that about publication. Book is familiar on every person. Yes, it is proper. Because start from on kindergarten until university need this specific Biometric Systems: Technology, Design and Performance Evaluation to read.

Thomas Hayden:

This Biometric Systems: Technology, Design and Performance Evaluation book is just not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is usually information inside this publication incredible fresh, you will get info which is getting deeper you actually read a lot of information you will get. This particular Biometric Systems: Technology, Design and Performance Evaluation without we know teach the one who reading it become critical in thinking and analyzing. Don't become worry Biometric Systems: Technology, Design and Performance Evaluation can bring if you are and not make your tote space or bookshelves' turn out to be full because you can have it within your lovely laptop even cellphone. This Biometric Systems: Technology, Design and Performance Evaluation having excellent arrangement in word in addition to layout, so you will not really feel uninterested in reading.

Diane Russel:

Are you kind of hectic person, only have 10 as well as 15 minute in your moment to upgrading your mind skill or thinking skill actually analytical thinking? Then you are having problem with the book in comparison with can satisfy your limited time to read it because this all time you only find reserve that need more time to be examine. Biometric Systems: Technology, Design and Performance Evaluation can be your answer because it can be read by you actually who have those short spare time problems.

David Brouwer:

That e-book can make you to feel relax. That book Biometric Systems: Technology, Design and Performance Evaluation was bright colored and of course has pictures on the website. As we know that book Biometric

Systems: Technology, Design and Performance Evaluation has many kinds or genre. Start from kids until teens. For example Naruto or Detective Conan you can read and believe that you are the character on there. Therefore , not at all of book are generally make you bored, any it makes you feel happy, fun and loosen up. Try to choose the best book in your case and try to like reading in which.
