Modeling Forest Trees and Stands By Harold E. Burkhart, Margarida Tomé

Drawing upon a wealth of past research and results, this book provides a comprehensive summary of state-of-the-art methods for empirical modeling of forest trees and stands. It opens by describing methods for quantifying individual trees, progresses to a thorough coverage of whole-stand, size-class and individual-tree approaches for modeling forest stand dynamics, growth and yield, moves on to methods for incorporating response to silvicultural treatments and wood quality characteristics in forest growth and yield models, and concludes with a discussion on evaluating and implementing growth and yield models.

Ideal for use in graduate-level forestry courses, this book also provides ready access to a plethora of reference material for researchers working in growth and yield modeling.

Editorial Review

From the Back Cover

Drawing upon a wealth of past research and results, this book provides a comprehensive summary of state-of-the-art methods for empirical modeling of forest trees and stands. It opens by describing methods for quantifying individual trees, progresses to a thorough coverage of whole-stand, size-class and individual-tree approaches for modeling forest stand dynamics, growth and yield, moves on to methods for incorporating response to silvicultural treatments and wood quality characteristics in forest growth and yield models, and concludes with a discussion on evaluating and implementing growth and yield models.

Ideal for use in graduate-level forestry courses, this book also provides ready access to a plethora of reference material for researchers working in growth and yield modeling.

About the Author

Dr. Harold Burkhart, University Distinguished Professor Department of Forest Resources and Environmental Conservation, College of Natural Resources and Environment, Virginia Tech University, Blacksburg, VA 24061, USA Interest Areas: Modeling forest stand dynamics, growth and yield; applying quantitative analysis techniques to forestry problems. B.S., Oklahoma State University (1965) M.S., University of Georgia (1967) Ph.D., University of Georgia (1969) Current research project Cooperative Research Program in Growth and Yield of Managed Stands of Loblolly Pine (Twelve industrial forestry firms plus Virginia Department of Forest Resources and Environmental Conservation and USDA Forest Service, 1979-present): The objective of this Cooperative is to develop loblolly pine tree growth and stand development models sufficiently flexible to account for the effects of intensive cultural practices, with output sufficiently detailed to allow for analyses of a full range of utilization options. The Cooperative maintains three large field studies: (1) a set of designed spacing trials, (2) a region-wide set of growth plots in intensively managed plantations, and (3) two pruning experiments and is part of the NSF Center for Advanced Forestry Systems.

Users Review

From reader reviews:

Michael Floyd:

This Modeling Forest Trees and Stands book is just not ordinary book, you have it then the world is in your hands. The benefit you get by reading this book will be information inside this reserve incredible fresh, you will get info which is getting deeper an individual read a lot of information you will get. This Modeling Forest Trees and Stands without we recognize teach the one who looking at it become critical in pondering

and analyzing. Don't be worry Modeling Forest Trees and Stands can bring whenever you are and not make your handbag space or bookshelves' come to be full because you can have it in the lovely laptop even cellphone. This Modeling Forest Trees and Stands having fine arrangement in word and layout, so you will not sense uninterested in reading.

Tracy Rendon:

Spent a free time and energy to be fun activity to perform! A lot of people spent their free time with their family, or their friends. Usually they performing activity like watching television, planning to beach, or picnic in the park. They actually doing same task every week. Do you feel it? Do you want to something different to fill your own free time/ holiday? Might be reading a book is usually option to fill your free time/ holiday. The first thing that you'll ask may be what kinds of reserve that you should read. If you want to test look for book, may be the book untitled Modeling Forest Trees and Stands can be great book to read. May be it can be best activity to you.

Robert Garcia:

Don't be worry in case you are afraid that this book will certainly filled the space in your house, you will get it in e-book approach, more simple and reachable. This kind of Modeling Forest Trees and Stands can give you a lot of pals because by you checking out this one book you have thing that they don't and make you actually more like an interesting person. This particular book can be one of one step for you to get success. This e-book offer you information that probably your friend doesn't realize, by knowing more than additional make you to be great men and women. So , why hesitate? Let us have Modeling Forest Trees and Stands.

Wilda Baeza:

A lot of book has printed but it is different. You can get it by web on social media. You can choose the top book for you, science, witty, novel, or whatever by means of searching from it. It is named of book Modeling Forest Trees and Stands. You can contribute your knowledge by it. Without leaving behind the printed book, it could possibly add your knowledge and make a person happier to read. It is most critical that, you must aware about reserve. It can bring you from one destination to other place.
