An Introduction to Biostatistics By Kevin Mitchell Thomas Glover

New publisher! New price! This accessible, complete introduction to the use of statistics in the biological sciences emphasizes the relationships among probability, probability distributions, and hypothesis testing. There are examples throughout the text taken from many areas in the life sciences, including genetics, physiology, ecology, agriculture, and medicine. The authors highlight the expected value of various test statistics under the null and research hypotheses as a way to understand the methodology of hypothesis testing. In addition, they incorporate nonparametric alternatives to many situations along with the usual parametric analysis. Key features include: 1) each chapter includes a broad set of problems with varying degrees of difficulty, selected answers are located in the back of the book; 2) interesting and easily understood examples are included with each concept; and 3) end-of-chapter problems are randomized within each chapter, requiring students to choose the appropriate analysis and helping them to develop critical decision-making skills.

Editorial Review

From the Publisher

Title of related interest also from Waveland Press: Hampton-Havel, Introductory Biological Statistics, Second Edition (ISBN 1577663802).

From the Back Cover

"The text is well organized and clear, quite suitable for an introductory-level course in statistics for the biological sciences. The sets of problems are very relevant and help solidify the concepts." -- Frank Siewerdt, University of Maryland

"I am very impressed with this text. I especially like the number and diversity of the problems at the end of each chapter. The low cost and accompanying CD is also attractive." -- Steven Slack, University of Memphis

"The examples are excellent and the text is very student friendly." -- Kipp Kruse, Eastern Illinois University

"Nice job! The book is updated, now includes a CD, and is less than one-half the price. It is the perfect size (amount of material) for a solid undergraduate biostatistics course." -- Marc Albrecht, University of Nebraska
