**Equine Reproductive Physiology, Breeding and Stud Management** By Mina C. G. Davies Morel

Fully updated and revised, the fourth edition of this popular textbook provides a complete and comprehensive account of how to successfully breed horses. Beginning with a grounding in reproductive anatomy, it reviews endocrine control and selection for breeding mares and stallions, pregnancy, parturition and lactation.

- Important new techniques such as cloning, intra-cytoplasmic sperm injections (ICSI) and in vitro fertilization (IVF) are covered in detail and bring the reader up to date.
- Over 300 photographs and two-color illustrations help to explain the text.
- A bestselling textbook from an expert, well-known author.

This textbook provides complete coverage of equine reproductive physiology, and will continue to be required reading for many equine science and related veterinary courses.
