Connect Access Card for Exploring Physical Geography By Stephen Reynolds, Julia Johnson, Mark Andrew Francek Professor, Peter Waylen Professor, Robert V. Rohli Professor

McGraw-Hill Connect® is a subscription-based learning service accessible online through your personal computer or tablet. Choose this option if your instructor will require Connect to be used in the course. Your subscription to Connect includes the following:

- SmartBook® - an adaptive digital version of the course textbook that personalizes your reading experience based on how well you are learning the content.
- Access to your instructor's homework assignments, quizzes, syllabus, notes, reminders, and other important files for the course.
- Progress dashboards that quickly show how you are performing on your assignments and tips for improvement.
- The option to purchase (for a small fee) a print version of the book. This binder-ready, loose-leaf version includes free shipping.

Complete system requirements to use Connect can be found here:

<http://www.mheducation.com/highered/platforms/connect/training-support-students.html>

Editorial Review

About the Author

Stephen J. Reynolds is the author of the highly successful *Exploring Geology*, Stephen Reynolds is bringing his innovation and strong visual content to *Exploring Physical Geography*. Stephen J. Reynolds received an undergraduate degree from the University of Texas at El Paso, and M.S. and Ph.D. degrees in geosciences from the University of Arizona. He then spent ten years directing the geologic framework and mapping program of the Arizona Geological Survey, completing a new Geologic Map of Arizona. Steve currently is a professor in the School of Earth and Space Exploration at Arizona State University, where he has taught various courses about regional geology, earth resources, evolution of landscapes, field studies, and teaching methods. As a National Association of Geoscience Teachers (NAGT) distinguished speaker, he traveled across the country presenting talks and workshops on how to infuse active learning and inquiry into large introductory geology classes. He is commonly an invited speaker to national workshops and symposia on active learning, visualization, and teaching.

Mark Francek is a geography professor at Central Michigan University (CMU). Before coming to CMU in 1988, Francek earned his doctorate in geography from the University of Wisconsin-Milwaukee, his master's in geography from the University of South Carolina, and his bachelor's degree in geography and psychology from the State University College at Geneseo, New York. He has teaching and research interests in earth science education, physical geography, and soil science. Mark has pedaled twice across America and teaches biking geography field classes in around the Great Lakes region and Appalachian Mountains. He has authored and coauthored more than 30 scholarly papers, funded in part by the NSF and the State of Michigan, and has presented his research at numerous national and state conferences. At CMU, Francek has served as acting director of the Environmental Studies Program and Director of the Science and Technology Residential College.

Peter Waylen is Robin and Jean Gibson Professor of Geography at the University of Florida. He holds a B.Sc. in Geography from the London School of Economics, England, and a Ph.D. from McMaster University, Canada. He has also served as Assistant Professor at the University of Saskatchewan, visiting Associate Professor at the University of Waterloo, Canada, Hartley Visiting Research Fellow at the University of Southampton, England, and Visiting Scholar in the Department of Engineering Hydrology, University College Galway, Ireland. His teaching and research interests are in the fields of hydrology and climatology, particularly the temporal and spatial variability of risks of such hazards as floods, droughts, freezes, and heat waves, and the way in which these vary in the long run, driven by global scale phenomenon like ENSO. He has worked throughout Anglo- and Latin America, and several parts of Africa. He teaches Introductory Physical Geography, Principles of Geographic Hydrology, and Models in Hydrology, and was selected University of Florida Teacher of the Year in 2002.

Julia K. Johnson is currently a full-time faculty member in the School of Earth and Space Exploration at Arizona State University. Her M.S. and Ph.D. research involved structural geology and geoscience education research. The main focus of her geoscience education research is on student- and instructor-generated sketches for learning, teaching, and assessment in college geology classes. Prior to coming to ASU, she did groundwater studies of copper deposits and then taught full time in the Maricopa County Community College District, teaching Physical Geology, Environmental Geology, and their labs. At ASU, she teaches Introduction to Geology to nearly 1,000 students per year and supervises the associated introductory geology

labs. She also coordinates the introductory geology teaching efforts of the School of Earth and Space Exploration, helping other instructors incorporate active learning and inquiry into large lecture classes.

Robert Rohli received a B.A. in geography from the University of New Orleans, an M.S. degree in atmospheric sciences from The Ohio State University, and a Ph.D. in geography from Louisiana State University (LSU). He is currently in his 14th year at LSU, with his time is divided between Faculty Director of the LSU Residential Colleges Program and Professor of Geography. Previously, he served as Assistant Professor of Geography at Kent State University (KSU) and as Regional Climatologist at the Southern Regional Climate Center. His teaching and research interests are in physical geography, particularly synoptic and applied meteorology/climatology, atmospheric circulation variability, and hydroclimatology. He has taught Physical Geography, Climatology, Meteorology, Physical Climatology, World Climates, Methods in Synoptic Climatology, Applied Meteorology, Analysis of Spatial Data, Water Resources Geography, and others.

Users Review

From reader reviews:

Shelia Coggins:

Now a day those who Living in the era wherever everything reachable by talk with the internet and the resources inside it can be true or not demand people to be aware of each information they get. How individuals to be smart in having any information nowadays? Of course the solution is reading a book. Examining a book can help persons out of this uncertainty Information mainly this Connect Access Card for Exploring Physical Geography book since this book offers you rich facts and knowledge. Of course the details in this book hundred percent guarantees there is no doubt in it you probably know this.

Melissa Sanders:

People live in this new time of lifestyle always make an effort to and must have the extra time or they will get wide range of stress from both day to day life and work. So , when we ask do people have extra time, we will say absolutely yes. People is human not really a robot. Then we request again, what kind of activity do you have when the spare time coming to anyone of course your answer can unlimited right. Then do you try this one, reading textbooks. It can be your alternative with spending your spare time, the book you have read is definitely Connect Access Card for Exploring Physical Geography.

Aaron Blue:

Reading can called brain hangout, why? Because when you find yourself reading a book especially book entitled Connect Access Card for Exploring Physical Geography your thoughts will drift away trough every dimension, wandering in most aspect that maybe unknown for but surely will become your mind friends. Imaging each word written in a publication then become one form conclusion and explanation this maybe you never get ahead of. The Connect Access Card for Exploring Physical Geography giving you one more experience more than blown away your thoughts but also giving you useful information for your better life in this particular era. So now let us explain to you the relaxing pattern at this point is your body and mind are going to be pleased when you are finished examining it, like winning a sport. Do you want to try this extraordinary shelling out spare time activity?

Patricia Carter:

Do you have something that you prefer such as book? The reserve lovers usually prefer to choose book like comic, limited story and the biggest one is novel. Now, why not hoping Connect Access Card for Exploring Physical Geography that give your entertainment preference will be satisfied through reading this book. Reading practice all over the world can be said as the opportunity for people to know world far better then how they react when it comes to the world. It can't be explained constantly that reading habit only for the geeky man but for all of you who wants to always be success person. So , for every you who want to start reading as your good habit, you can pick Connect Access Card for Exploring Physical Geography become your own personal starter.
