## Handbook of Space Law (Research Handbooks in International Law series)

By Frans Von Der Dunk, Fabio Tronchetti

*'The intellectual frontlines of the coming skirmishes along this new frontier will doubtless be populated by the readers of this Handbook of Space Law. Just like the book offers a multi-angular approach to the various main issues involved, the increasing diversity and audacity of the entrepreneurs in the emerging space arena will require a matching multi-dimensional cast of space lawyers.'*

- Taken from the Foreword by Rusty Schweickart, Apollo 9

*'It is highly recommendable to study this comprehensive work edited by Frans von der Dunk and have it on the bookshelf as a reliable piece of information and a source of thought provoking ideas.'*

- Mahulena Hofmann, together with Andreas Loukakis and Simona Spassova, SES Chair in Satellite Communication and Media Law, University of Luxembourg

The *Handbook of Space Law* addresses the legal and regulatory aspects of activities in outer space and major space applications from a comprehensive and structured perspective. It fundamentally addresses the dichotomy between the state-oriented character of international space law and the increasing commercialization and privatization of space activities.

The book focuses on international space law in the broadest sense of the word, not only including the UN-based space treaties and international customary (space) law, but also the many specialized regimes such as those applicable to the international satellite organizations, the International Space Station, the international trade and the security-sensitive aspects of space technology exports, the financing of space ventures and environmental concerns. The novelty of this holistic approach to space law notably includes the profound and ever-increasing commercialization of space activities and the attendant involvement of the private sector in such activities. This authoritative book thus presents a unique standard work of reference for anyone interested in studying or researching the legal and regulatory aspects of space activities and their major applications in depth.

Offering the most comprehensive and holistic analysis on legal and regulatory aspects of space activities and major space applications to date this *Handbook* will be of particular interest to students in space law higher education, public international law, researchers (including JSD and PhD students) of space law and practitioners in the major sectors of space activities.

**Contributors include:** C. Doldirina, C. Gaubert, P. Jankowitsch, I. Marboe, R.L. Schweickart, C. Sharpe, L.J. Smith, M. Sundahl, F. Tronchetti, P. van Fenema, L. Viikari, F. von der Dunk, M. Williams

### Editorial Review

#### Review

*'Offering the most comprehensive and up-to-date analysis on legal and regulatory aspects of space activities and major space applications, this Handbook of Space Law provides fundamental guidance to those who are interested in the legal aspects of mankind's main activities in outer space. The handbook will be of particular interest to students, researchers, lawyers, and policy-makers in space law in general or in particular areas thereof. Due to the highly dynamic nature of space technology and applications, it is possible that new legal and regulatory issues will arise after the appearance of this handbook. In the further examination of such new issues, the comprehensive scope, the multidimensional and comparative approach, and the forward-looking perspective adopted in this study should be encouraged.'* --Chinese Journal of Comparative Law

*'This handbook will - with all these merits - become a leading publication in the field of space law for retrieving information, analysis as well as inspiration. Editor, assistant editor and the further ten contributors have rendered an outstanding service to space law.'* --Prof. Dr. Kai-Uwe Schrogli, Zeitschrift fur Luft- und Weltraumrecht

*'If you want to own only one book on space law the newly published Handbook of Space Law, edited by Professor Frans von der Dunk, is it!'* --Air and Space Law

#### About the Author

Edited by **Frans von der Dunk**, Harvey & Susan Perlman Alumni/Othmer Professor of Space Law, University of Nebraska-Lincoln, USA and Director, Black Holes B.V., Leiden, the Netherlands, with **Fabio Tronchetti**

### Users Review

#### From reader reviews:

##### Michael Gibson:

In this 21st centuries, people become competitive in most way. By being competitive now, people have do something to make them survives, being in the middle of the crowded place and notice simply by surrounding. One thing that oftentimes many people have underestimated this for a while is reading. Yeah, by reading a book your ability to survive enhance then having chance to stand up than other is high. In your case who want to start reading a new book, we give you this particular Handbook of Space Law (Research Handbooks in International Law series) book as starter and daily reading publication. Why, because this book is greater than just a book.

##### Tara Wilson:

Now a day people that Living in the era wherever everything reachable by connect with the internet and the resources inside can be true or not involve people to be aware of each information they get. How people have to be smart in acquiring any information nowadays? Of course the solution is reading a book. Studying a book can help individuals out of this uncertainty Information mainly this Handbook of Space Law (Research
