## Mutation-Driven Evolution By Masatoshi Nei

The purpose of this book is to present a new mechanistic theory of mutation-driven evolution based on recent advances in genomics and evolutionary developmental biology. The theory asserts, perhaps somewhat controversially, that the driving force behind evolution is mutation, with natural selection being of only secondary importance. The word 'mutation' is used to describe any kind of change in DNA such as nucleotide substitution, gene duplication/deletion, chromosomal change, and genome duplication. A brief history of the principal evolutionary theories (Darwinism, mutationism, neo-Darwinism, and neo-mutationism) that preceded the theory of mutation-driven evolution is also presented in the context of the last 150 years of research. However, the core of the book is concerned with recent studies of genomics and the molecular basis of phenotypic evolution, and their relevance to mutation-driven evolution. In contrast to neo-Darwinism, mutation-driven evolution is capable of explaining real examples of evolution such as the evolution of olfactory receptors, sex-determination in animals, and the general scheme of hybrid sterility. In this sense the theory proposed is more realistic than its predecessors, and gives a more logical explanation of various evolutionary events.

*Mutation-Driven Evolution* is suitable for graduate level students as well as professional researchers (both empiricists and theoreticians) in the fields of molecular evolution and population genetics. It assumes that the readers are acquainted with basic knowledge of genetics and molecular biology.

## **Editorial Review**

### Review

"Overall, this is an interesting and useful book that brings up a less conventional and more current view of evolution. ... [Nei's] book makes a nice contribution in contrasting mathematical models of evolution with the real world, and the influence of external factors and internal molecular changes in the course of evolution. Above all, it shows that despite so much that we currently understand about evolution, there is still a lot to learn." --*Science and Education*

### About the Author

Masatoshi Nei is a molecular evolutionary geneticist and has developed many statistical methods that are widely used for evolutionary studies at present. He has also studied human evolution and evolution of multigene families, immune systems genes, sensory receptor genes, etc. Masatoshi Nei is currently Evan Pugh Professor of Biology at the Pennsylvania State University and is a member of the National Academy of Sciences. He received numerous Awards including the International Prize for Biology from Japan and the Thomas Morgan Medal from the Genetics Society of America. Nei is a co-founder of the journal *Molecular Biology and Evolution* and served as President of the Society for the Study of Molecular Biology and Evolution and American Genetic Association.

### **From reader reviews:**

#### **Ethel Ellis:**

With other case, little people like to read book *Mutation-Driven Evolution*. You can choose the best book if you like reading a book. Given that we know about how is important the book *Mutation-Driven Evolution*. You can add know-how and of course you can around the world by the book. Absolutely right, mainly because from book you can know everything! From your country until eventually foreign or abroad you can be known. About simple factor until wonderful thing you can know that. In this era, you can open a book or maybe searching by internet device. It is called e-book. You can utilize it when you feel fed up to go to the library. Let's go through.

#### **Carolyn Robles:**

What do you in relation to book? It is not important with you? Or just adding material when you want something to explain what you problem? How about your time? Or are you busy individual? If you don't have spare time to do others business, it is make you feel bored faster. And you have extra time? What did you do? Everyone has many questions above. They need to answer that question since just their can do which. It said that about reserve. Book is familiar in each person. Yes, it is proper. Because start from on pre-school until university need this *Mutation-Driven Evolution* to read.

**Elisa Dumont:**

Now a day people that Living in the era just where everything reachable by connect to the internet and the resources inside can be true or not need people to be aware of each info they get. How people have to be smart in getting any information nowadays? Of course the correct answer is reading a book. Looking at a book can help people out of this uncertainty Information mainly this Mutation-Driven Evolution book because book offers you rich information and knowledge. Of course the information in this book hundred % guarantees there is no doubt in it you may already know.

**Brenda Moulton:**

This Mutation-Driven Evolution is great publication for you because the content and that is full of information for you who else always deal with world and also have to make decision every minute. That book reveal it facts accurately using great manage word or we can say no rambling sentences within it. So if you are read the idea hurriedly you can have whole details in it. Doesn't mean it only will give you straight forward sentences but difficult core information with beautiful delivering sentences. Having Mutation-Driven Evolution in your hand like having the world in your arm, information in it is not ridiculous just one. We can say that no reserve that offer you world inside ten or fifteen minute right but this publication already do that. So , this really is good reading book. Hi Mr. and Mrs. stressful do you still doubt this?
